

COVID-19 Exposure Control and Safety Plan

NWC COVID-19 Exposure Control and Safety Plan is now available for review. The Council's safety plan consists of three (3) distinct documents:

- 1) The [NWC Safety Plan](#) which is the overarching plan and specific to the Northwest region WorkSource facilities;
- 2) The Office of Fiscal management (OFM)/Employment Security Dept (ESD) Safety and Facilities [Roadmap to Recovery Plan](#) (+ Appendices A-N), and
- 3) Governor's [Professional Services](#) Requirements (updated 6/2/2021)

In total, these documents are the COVID-19 safety protocols for NW WorkSource (WS) facilities. Any employee working in a WS facility, regardless of employer, must follow the guidelines set forth in the NWC COVID-19 Exposure Control and Safety Plan.

Each Center has a COVID Point of Contact (POC), and these contacts are listed on page 4 of the NWC Covid Plan. Please let us know if you have questions at info@workforcenorthwest.org
